1) Quantitative Research Assistant Position
Study Description: A cross-college, multi-faculty team, led by Dr. Fathima Wakeel in the College of Health, is conducting a two-phase study regarding the physical and mental health impacts of the COVID-19 pandemic in the Lehigh Valley community and nationally. The first phase of the study, which will take place from approximately August 2020-January 2021, will be administered among Lehigh Valley community residents. This phase of the study will comprise an online survey among 500 residents and a follow-up qualitative semi-structured interview (via Zoom) among 45-60 residents. The second phase of the study will occur from November 2020-May 2021 and will entail an online survey of a nationally representative sample of 3000 individuals in the U.S.

Job Description: We are hiring a graduate student researcher for the 2020-2021 academic year who will work closely with the research team to plan and administer both phases of the study as well as manage and analyze data from the study. The student researcher will be trained in qualitative interviewing and will be expected to conduct qualitative interviews with community residents via Zoom and report on the interview progress to the research team. The student researcher will also have the opportunity to collaborate with faculty to prepare manuscripts for publication based on study findings. This position will require 10 hours/week and will pay $20/hour.

Required Qualifications:
- Experience with literature review and analysis
- Experience with quantitative dataset creation and management
- Expertise in intermediate-level quantitative survey analysis (i.e., multivariable analysis)
- Experience with statistical software (e.g., SAS, SPSS, R)
- Basic project management skills (i.e., taking meeting minutes, communication with study sites, etc.)
- Strong interpersonal communication and collaboration skills

Preferred Qualifications:
- Experience with qualitative interviewing
- Experience with qualitative data management
- Expertise in qualitative data analysis using NVivo or similar software
- Speaking proficiency in Spanish
- Proficiency in translating from English to Spanish and from Spanish to English
- Experience with manuscript preparation

If you are interested in this position, please contact Dr. Wakeel at faw319@lehigh.edu
